*A REPORT ON THE SOLAR LIGHT DISTRIBUTION PROJECT
PARTNERSHIP WITH TEMA INTERNATIONAL SCHOOL*

On Monday November 21st, a team member embarked on a trip to the Upper East Region of Ghana to distribute Luke Solar Lights received from Tena International School through Mrs. Surama King. Abigail Brazy Mensah received the package on behalf of the team. It consisted of 200 Luke Solar Lights, 100 in each box.

The target area in the upper east region was Salpiiga, a town situated in Bawku West District with no access to light, as this was a requirement for identifying the communities to distribute these lights. On arrival, two days was spent sharing the Luke Solar Lights to the Salpiiga community after meeting the TINDAANA(landowners) and CHIEF of the Salpiiga community on the first day. One hundred Luke Solar Lights were distributed to the community and each household in the community received.

On Thursday 24th November 2022, the team member embarked on a trip to the second town, Nakor in the upper west region of Ghana, also with no access to electricity/ light. After meeting the chief on Thursday, distribution was made on Friday 25th November 2022 to each household.

All lights were distributed and all these communities without electricity have had access to solar lights to use in anticipation for a future plan where they will be connected to the national grid.

Although it was estimated to do more towns, we realized on the ground that the numbers were different from what was estimated.
